

1 Appendix 1. Cover in % \pm 1 SE of selected species (at least 1 % mean cover in 2002
2 or 2005) at the start of the experiment in spring 2005, and the effect of C- treatment
3 and grazing management on cover in spring 2005. Cover values in bold-face indicate
4 significant differences between management regimes ($p < 0.05$).
