

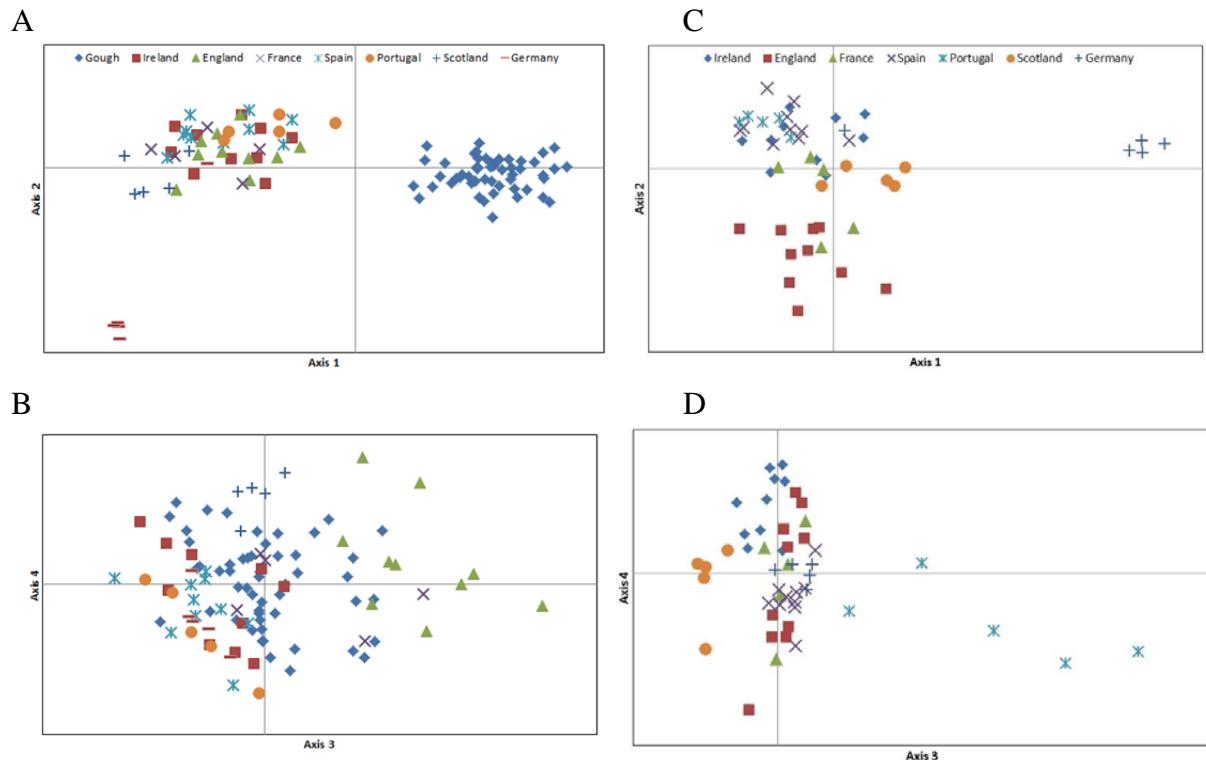

**Figure S1.** Bayesian phylogenetic tree constructed in Mr. Bayes based on mtDNA d-loop sequence. Numbers are posterior probabilities. Blue are *Mus musculus musculus* subspecies; orange are *M. m. castaneus*; red are *M. m. domesticus* with each region defined by a two or three letter code. Ge: Georgia, Ir: Iran, Sp: Spain, En: England, Fr: France, Ca: Cameroon, Ger: Germany, Sc: Scotland, Ire: Ireland, Gr: Greece, Au: Austria, Sw: Switzerland, Eg: Egypt, Tu: Turkey, Mo: Morocco, Un: United States, Po: Portugal, Is: Israel, Pe: Peru, It: Italy, Cr: Croatia, No: Norway, De: Denmark, Swe: Sweden.

**Figure S2.** Principal coordinate analysis of 21 microsatellite loci. A.) Axis 1 and Axis 2 for all populations. B.) Axis 3 and Axis 4 for all populations. C.) Axis 1 and Axis 2 for just the European populations. D.) Axis 3 and Axis 4 for just the European populations.

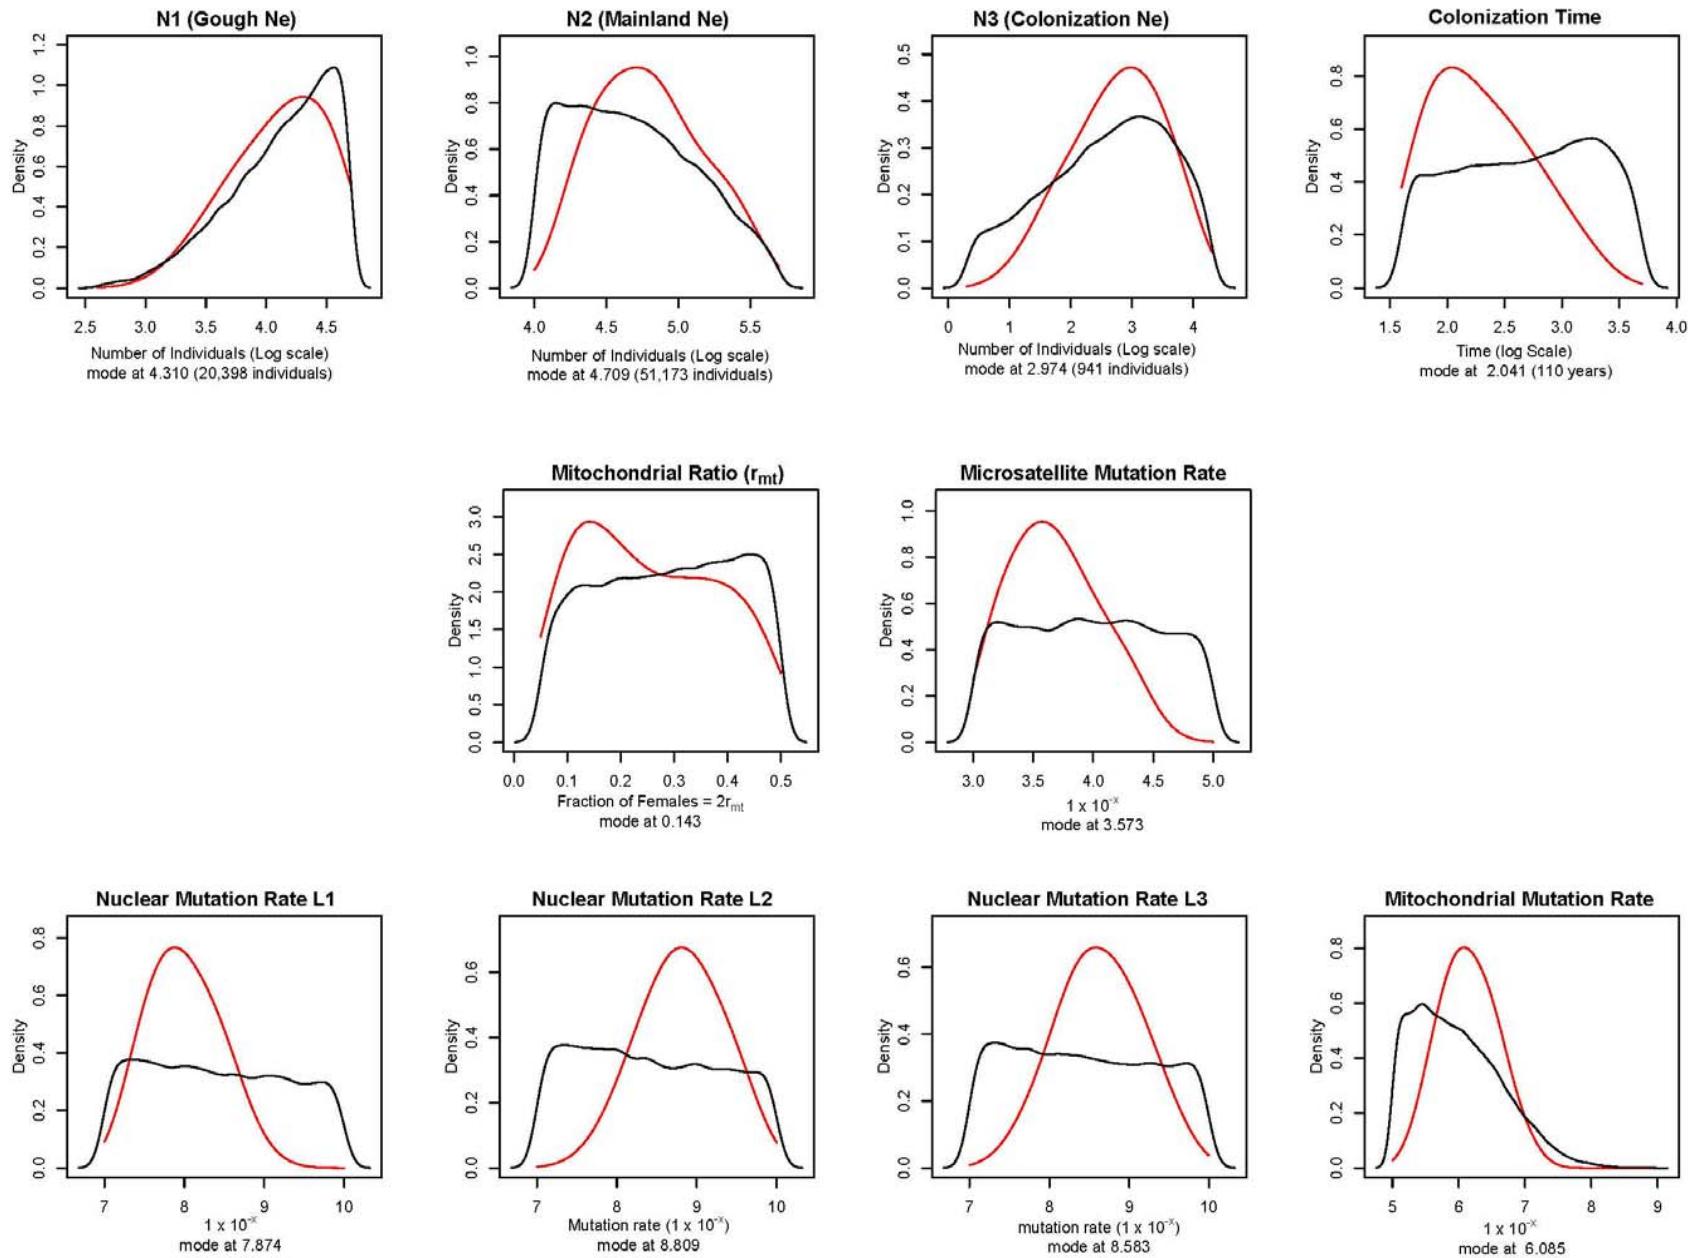

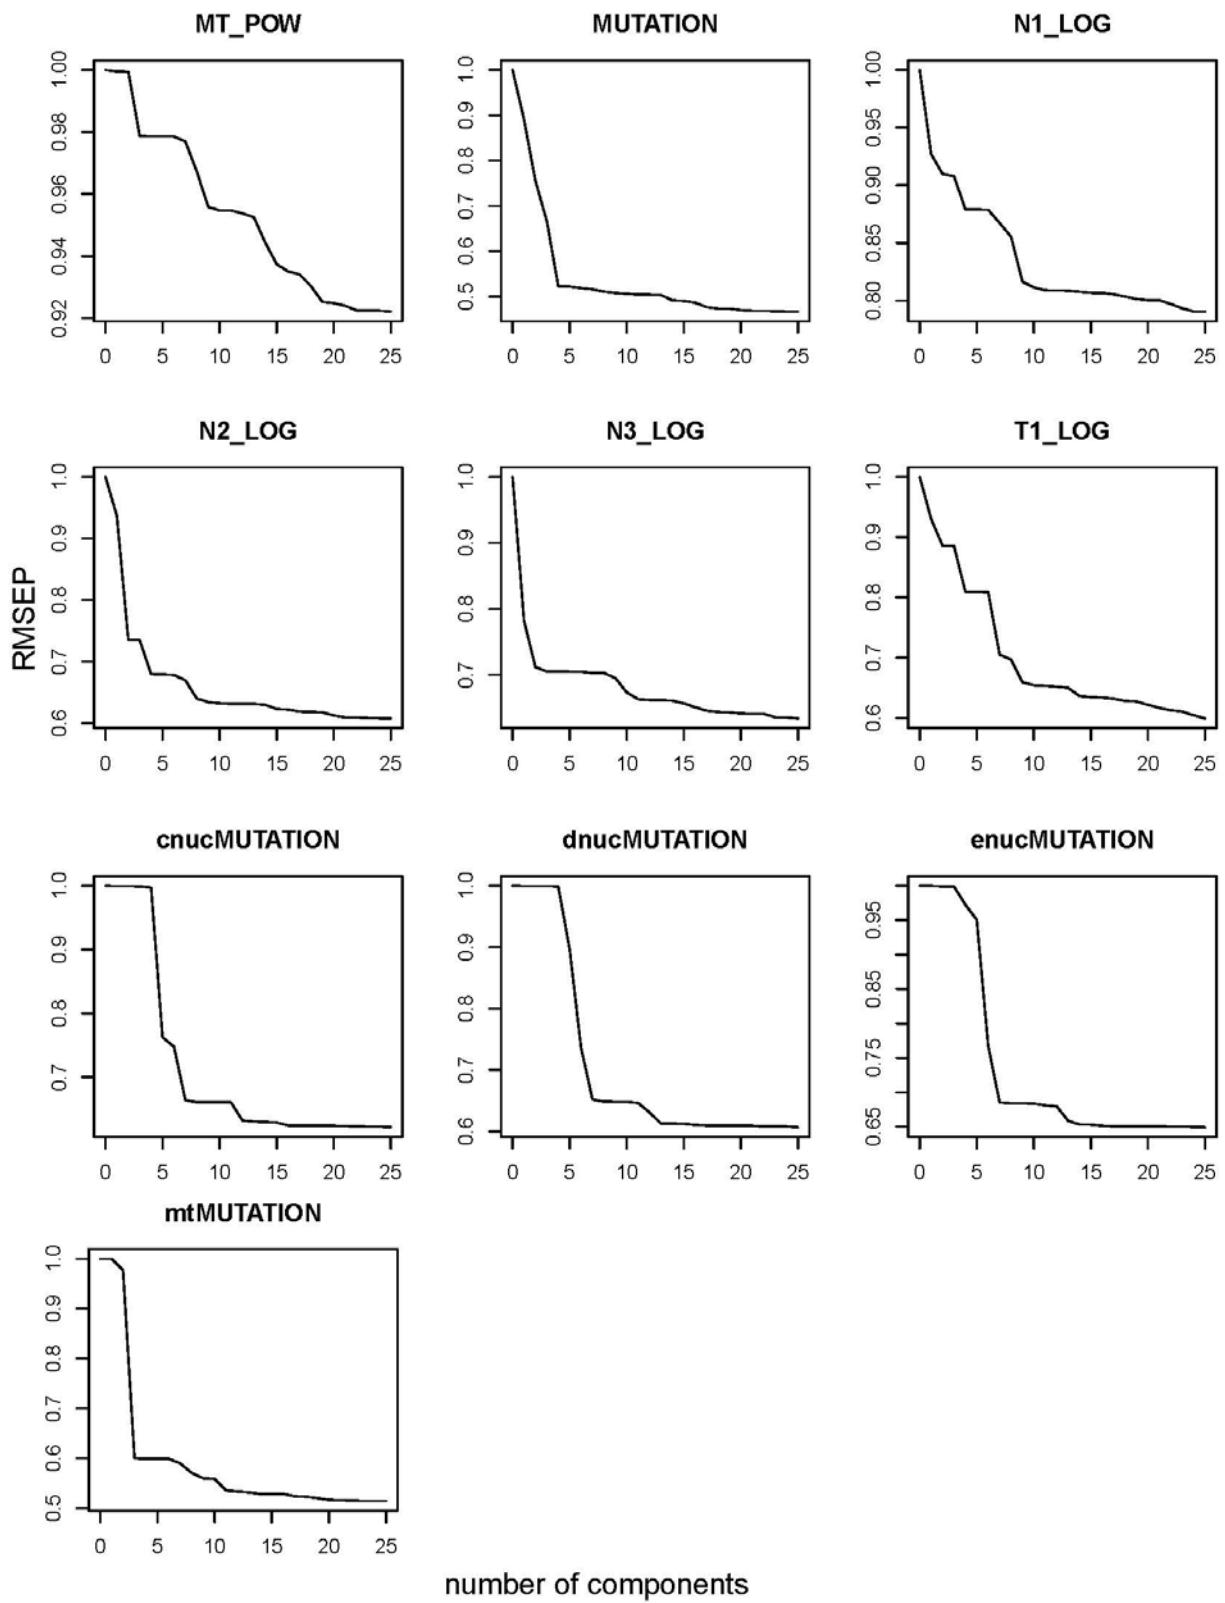

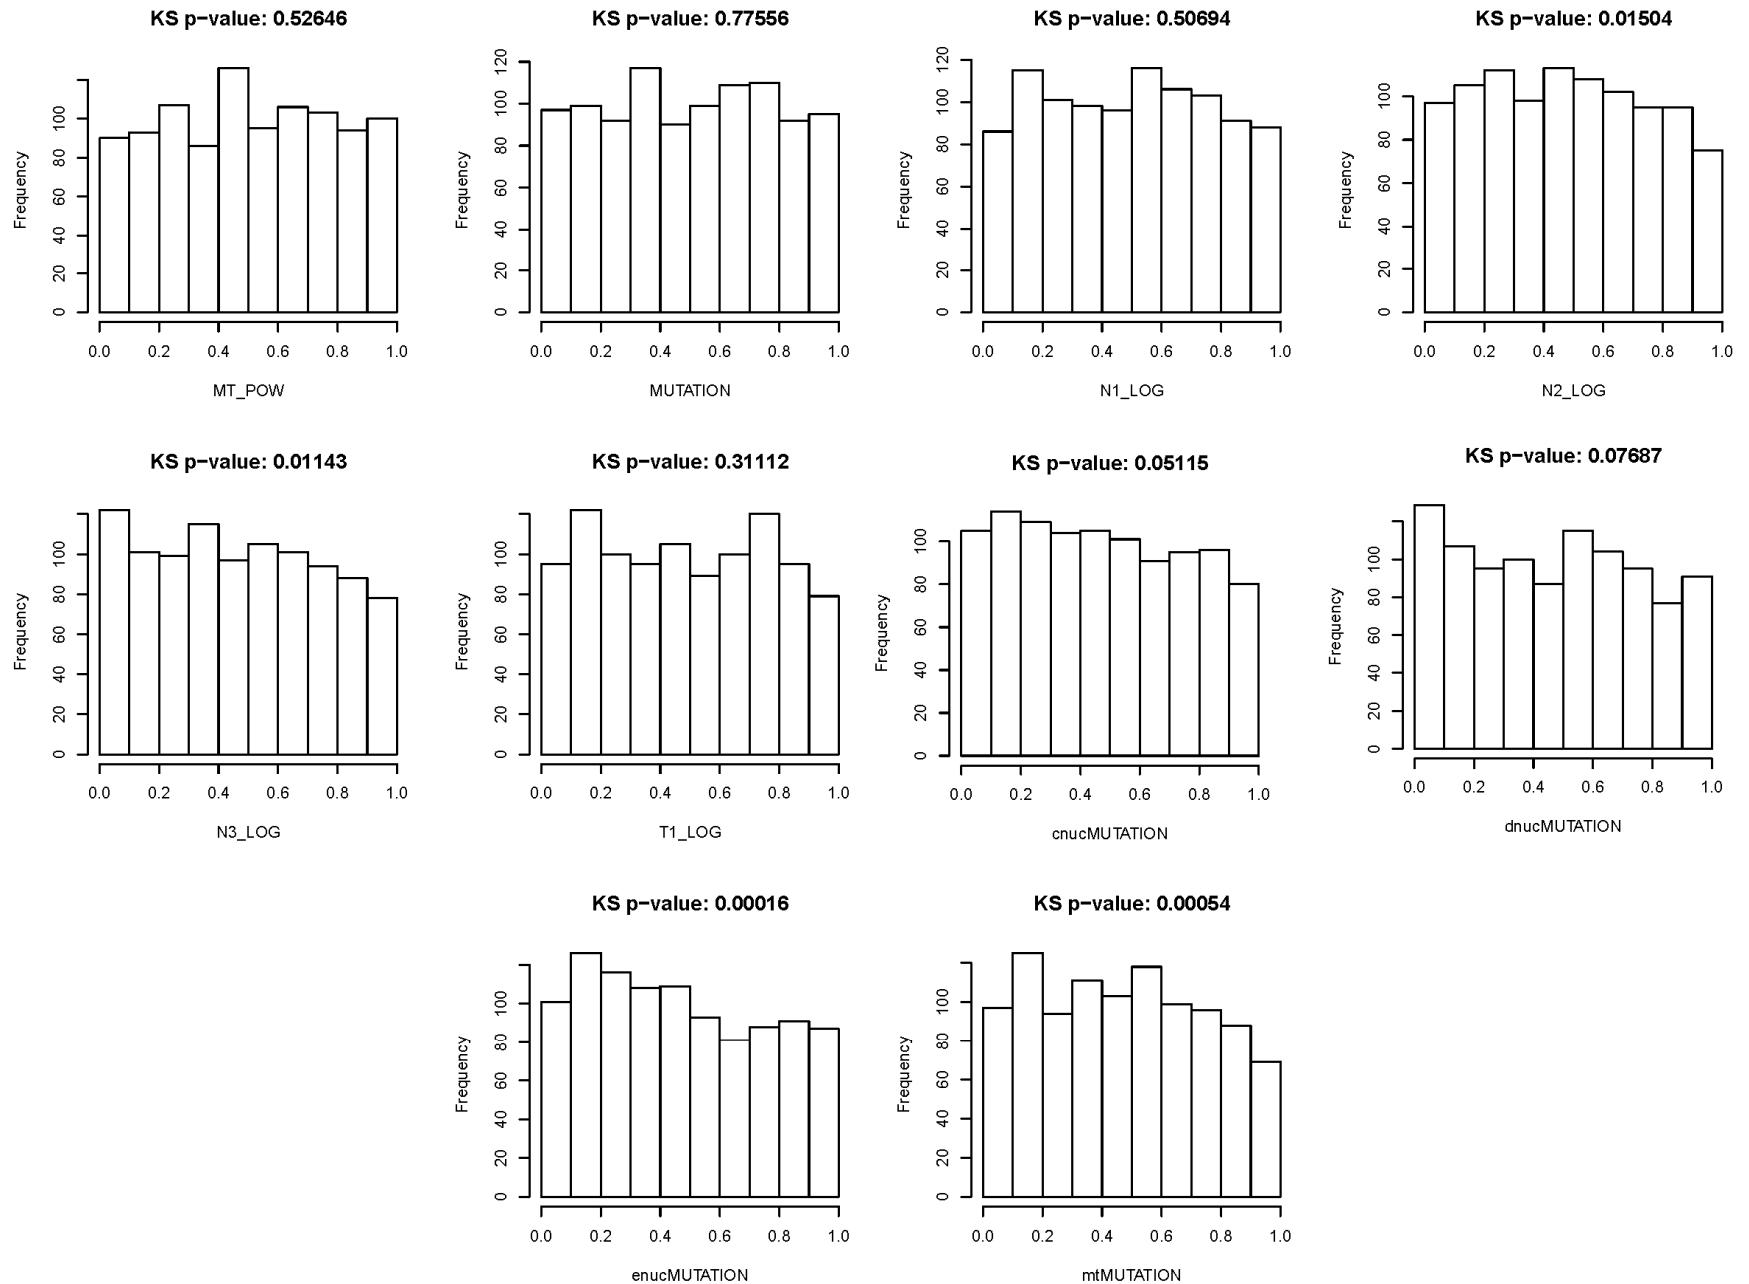

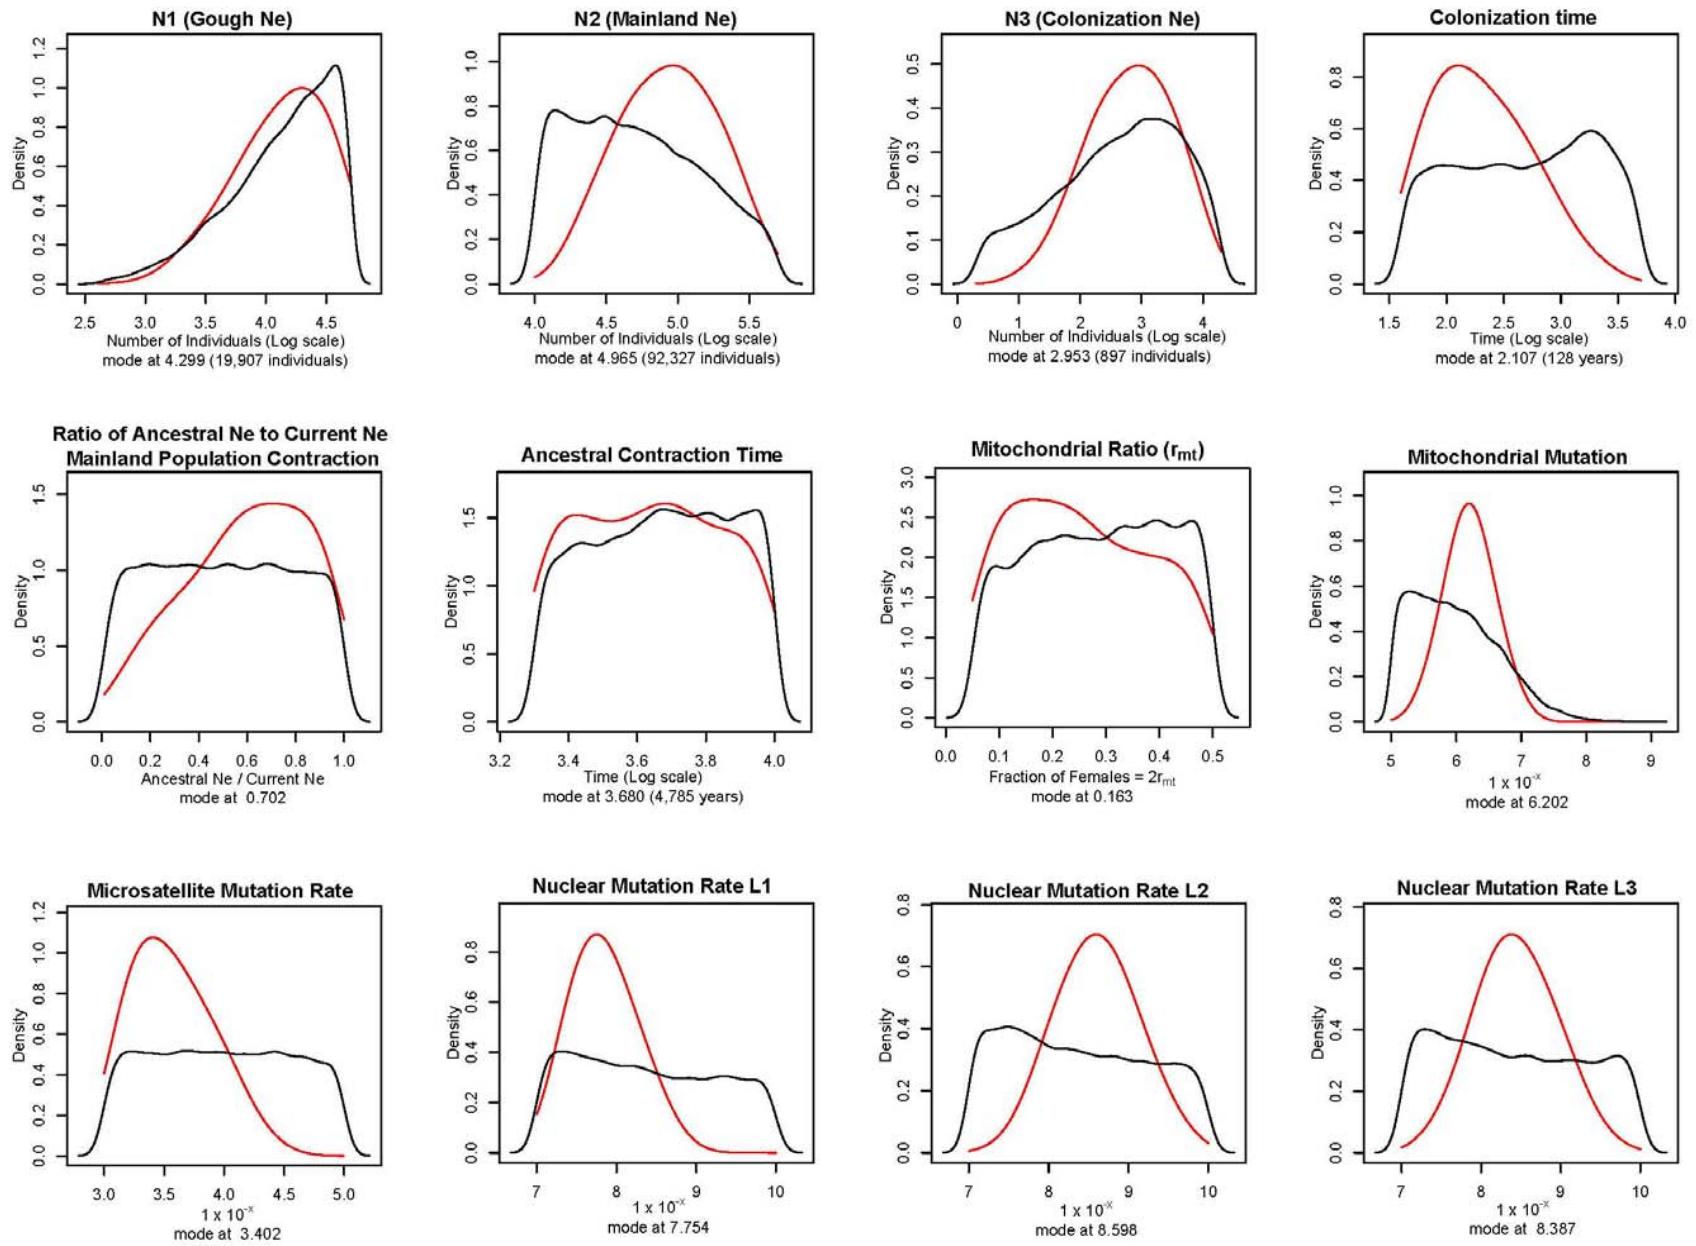

Figure S3. Posterior Density Distributions of the main model. Black lines indicate the prior distribution and the red lines indicate the posterior density distributions.

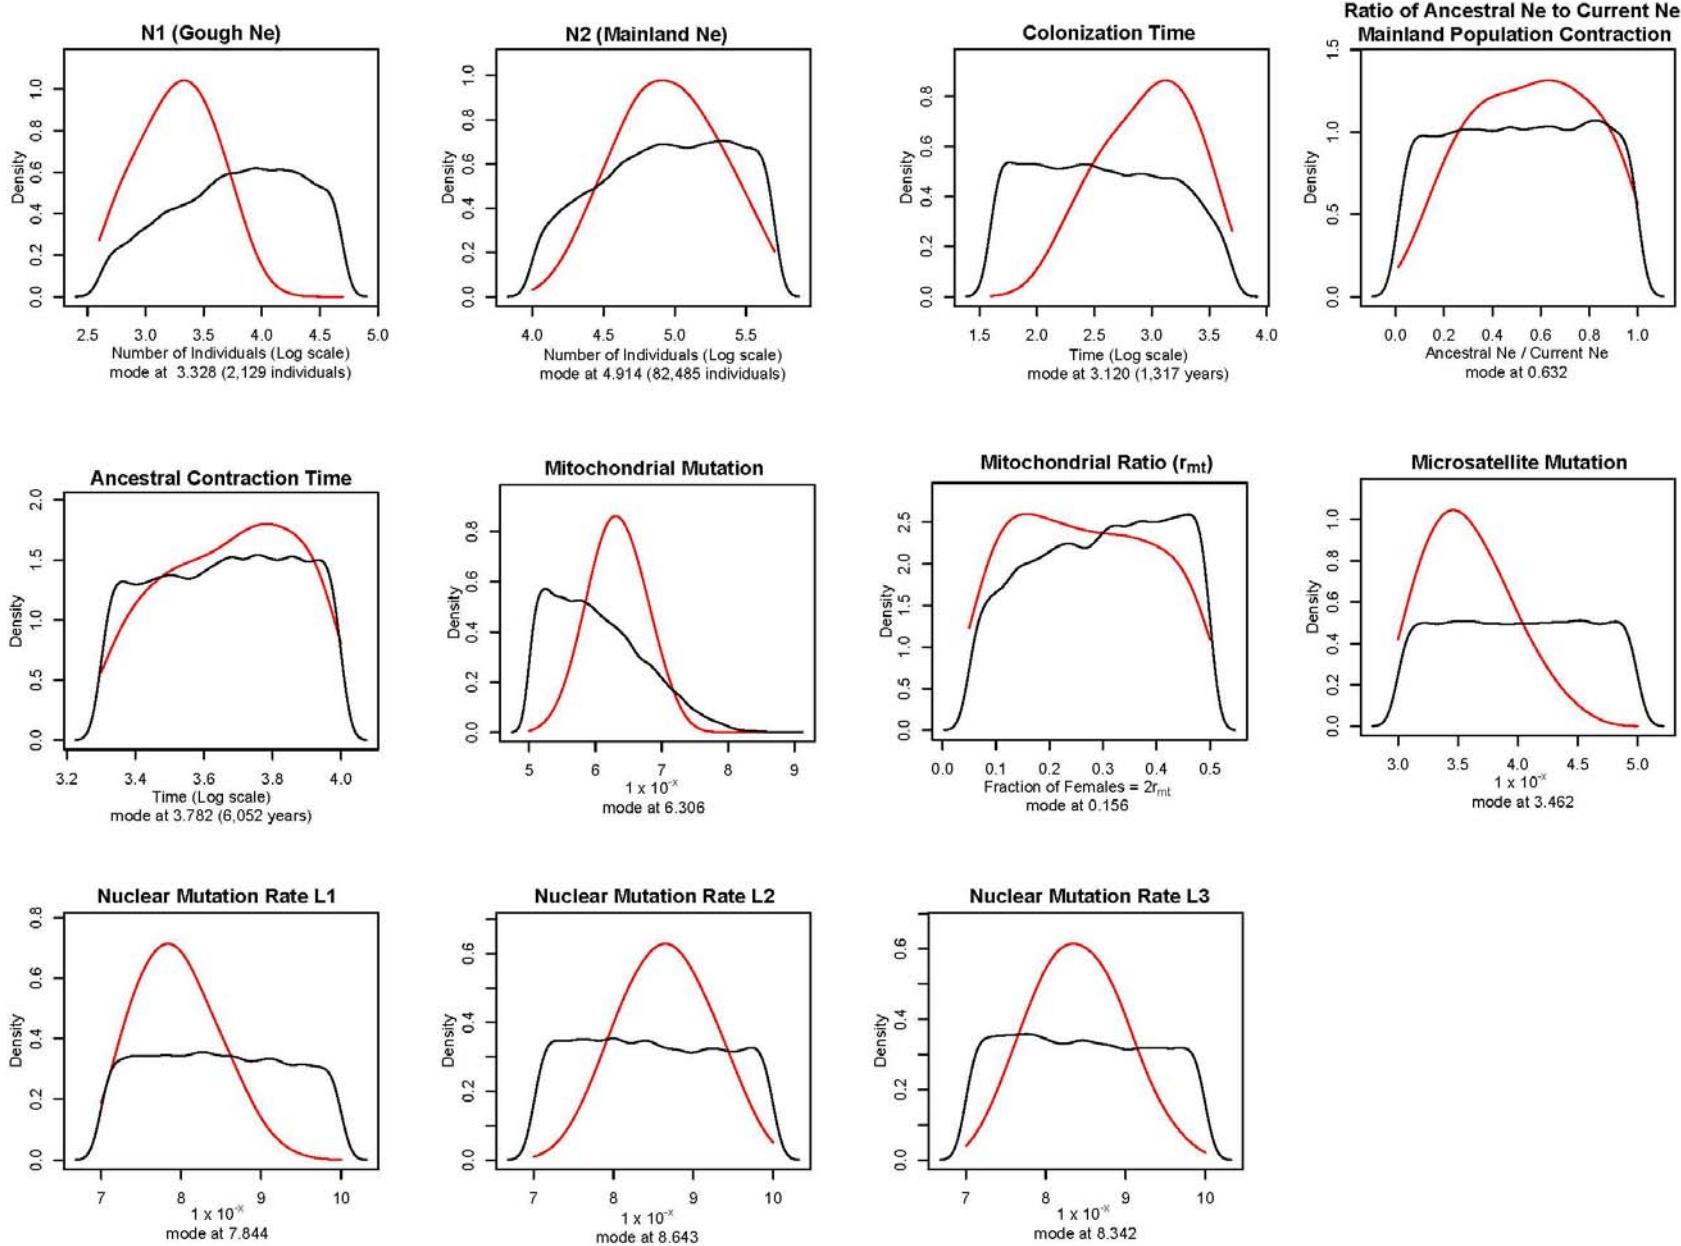

**Figure 4.** Root Mean Squared Error (RMSE) plots of partial least squared components for each parameter inferred in the main demographic model.

**Figure S5.** Distributions of the posterior quantiles for the parameters inferred in the main model of the ABC analysis. Values above the histograms are Kolmogorov-Smirnov test p-values.

**Figure S6.** Posterior Density Distributions of Variation 1 model. Black lines indicate the prior distribution and the red lines indicate the posterior density distributions.

**Figure S7.** Posterior Density Distributions of Variation 2 model. Black lines indicate the prior distribution and the red lines indicate the posterior density distributions.

**Table S1.** European samples included in the study.

N, number of chromosomes sampled; A, number of alleles; H<sub>o</sub>, observed heterozygosity; H<sub>e</sub>, expected heterozygosity; r, range of allele sizes; NGW, new(adjusted) Garza-Williamson statistics, HWE, Hardy-Weinberg p-values computed by Fischer's exact test.

**Table S5** Microsatellite allele frequencies per locus per country.
