Supplementary figure 1

Supplementary figure 1. Effects of ticagrelor and CAM on TFPI expression in HAECs. TFPI expression in TNF- α -stimulated HAECs treated with ticagrelor (n=8) (A) or CAM (n=8) (B). CAM = clopidogrel active metabolite; GAPDH = glyceraldehyde 3-phosphate dehydrogenase; HAECs = human aortic endothelial cells; TFPI = tissue factor pathway inhibitor; TNF- α = tumor necrosis factor-alpha.
