

Structural Interpretation

- Correlated fault stick (with intersection cross with other surveys)
- Non-correlated fault stick
- Conceptual fault stick
- Basal décollement zone
- Fault corridor boundary
- Major dip change line
- Fold axial surface

Stratigraphic Interpretation

- Horizon well defined
- Horizon poorly defined / intra Paleozoic reflections / near Base Quaternary model (GESDEC)
- Horizons TWT at line intersections
- Projected perpendicular to the seismic line

Well abbreviation (Map and section)

- | | |
|-------|--------------|
| 367 | Crassier |
| L410E | Bogis-Bossey |
| L552 | Céligny |
| Fg | Grilly |

Other abbreviations

- | | |
|-------|--------------------|
| Trace | Seismic trace |
| FZ | Fault zone |
| FC | Fault corridor |
| TWT | Two way traveltime |
| proj. | Projected |
| s | Seconds |
| nT | near Top |
| nB | near Base |
| Q | Quaternary |
| Cen | Cenozoic |
| UMa | Upper Malm |
| LMa | Lower Malm |
| Do | Dogger |
| Li | Lias |
| Keu | Keuper |
| Mus | Muschelkalk |
| Mes | Mesozoic |
| InPal | Intra Paleozoic |
